EXPERIENCE

Web-Based Faculty Hiring Management System Implementing Data Analytics

Academic Project – Web Application / HR Management System

Universidad de Manila | 2024–2025

- Contributed to the development of a web-based HR management system supporting faculty hiring and contract renewal processes.
- Assisted in implementing centralized management of faculty records, applications, vacancies, and renewals.
- Supported the integration of QR code-based applicant intake to improve submission efficiency and reduce manual processing.
- Participated in developing analytics dashboard features to aid data-driven decision-making.
- Helped implement role-based access control to ensure secure and structured system workflows.

Special Program for the Employment of Students (SPES)

Office Staff

Government Office | 2019 | 30-Day Employment

- Assisted office staff with clerical and administrative tasks such as filing, document organization, and data encoding.
- Helped in processing and routing office documents to support daily operations.
- Provided general office support and followed assigned tasks under supervision.
